Synesis Celebrates Anniversary of Nevron Software Partnership

Greenville, SC – June 6, 2013 – Synesis International, Inc. (Synesis) recently celebrated the one-year anniversary of their partnership with Nevron Software (Nevron). While researching SharePoint data visualization solutions last year, Synesis discovered and deployed the Nevron Vision for SharePoint Chart and Gauge solutions.

“The Nevron Chart and Gauge SharePoint web parts are unlike anything else in the market. These tools have been very well received by our clients,” Ricardo Studart, Synesis President, said. “Nevron has been an excellent company to work with both as a customer and an Integration Partner. We look forward to continued success with Nevron.”

Nevron Software is a global leader in component based data visualization technology for a diverse range of Microsoft centric platforms. Many companies and educational and government organizations around the world use Nevron Data Visualization components. Built with perfection, high usability and enterprise level features in mind, their components deliver advanced charts, diagrams, gauges and web user interface to the market. Today thousands of developers and IT professionals at both small businesses and Fortune 500 companies visualize their data with Nevron components.

“We are very pleased with the decision to choose Synesis as an integration partner. As a software vendor, we cherish dedication and professionalism, and Synesis’ team has proven to possess both,” said Nevron Director of Sales, Christo Bahchevanov. “They have in-depth understanding and knowledge of the Nevron products. We are confident that their team can provide valuable services in integrating the Nevron Data Visualization web parts in clients’ SharePoint environments, as well as in provide training or consulting services to customers.”
