

DOCUMENT MANAGEMENT MADE SIMPLE

Manage your business end-to-end using a single integrated system — SAP Business One

Document Control is the foundation of any well-run QMS. Managing and controlling company documents is critical to ensuring compliance with any quality standards and has never been easier than now with our SharePoint-based Document Control System.

www.synesisintl.com/qms/document-control

Customize

Our document control system supports multiple reviewers, configurable for each document, so you can control who and what.

Parallel Review

Our solution allows for parallel and sequential reviews so multiple people can review and make changes to the document.

Email Alerts

Receive an email alert when someone makes a change to the document so you can easily keep track of changes/edits.

About Us

With 25 years of experience as a business systems consulting and integration firm, we strive to be the leader in custom integration. Synesis understands manufacturing, operations and technology requirements. This fundamental difference in experience and perspective enables us to provide valuable solutions with proven results.

Synesis has developed a fixed-scope, fixed-price document control deliverable that includes both software and implementation services. We have combined the power of SharePoint with intuitive, flexible workflows to deliver an exceptional product at a great value.
